

Science & Technology Facilities Council

- STFC is one of the UK's Research Councils
- We fund research in
 - particle physics
 - nuclear physics
 - astronomy
- We operate large science facilities in the UK
 - Rutherford Appleton Lab (including ISIS neutron source, Central Laser Facility)
 - Daresbury Lab (Hartree Centre, Accelerator Science & Technology)
 - UK Astronomy Technology Centre, Edinburgh

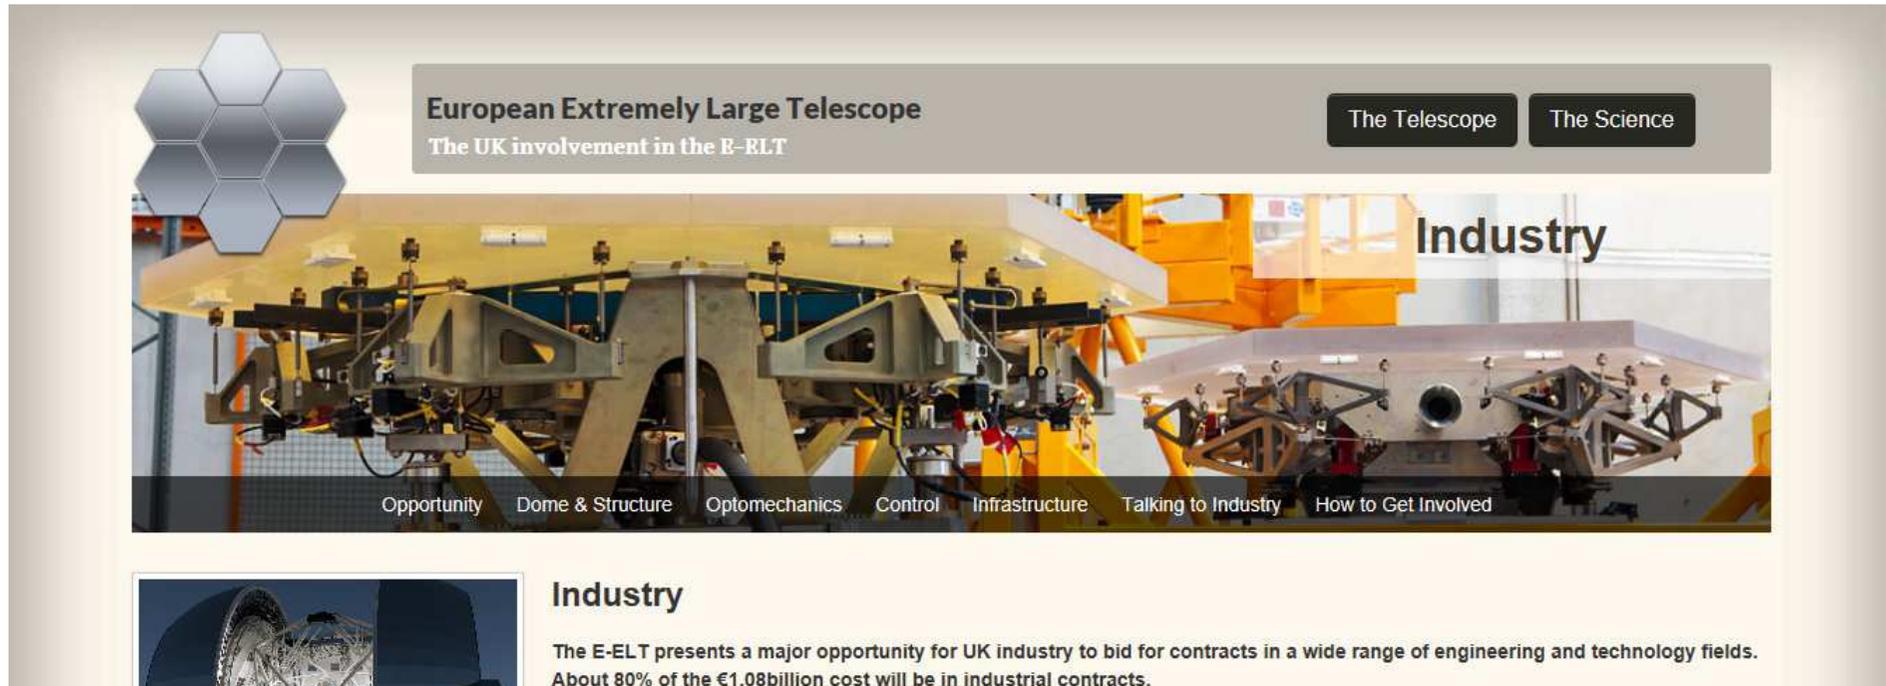

Science & Technology Facilities Council

- STFC funds access to large science facilities in Europe including:
 - CERN
 - ILL
 - ESRF
 - ESO
- Industry Liaison role for these facilities.
- Encourage UK companies to tender for contracts.
- Register via our website for tender alerts
 - <http://tenderopportunities.stfc.ac.uk/>

UK E-ELT Programme & UK Industry Liaison Office

The screenshot shows the website for the European Extremely Large Telescope (E-ELT) UK involvement. At the top left is a logo consisting of six grey hexagons. The main header reads "European Extremely Large Telescope" with the subtitle "The UK involvement in the E-ELT". To the right are two buttons: "The Telescope" and "The Science". Below this is a large image of telescope components with the word "Industry" overlaid in the top right. A navigation bar at the bottom of the image contains the following links: "Opportunity", "Dome & Structure", "Optomechanics", "Control", "Infrastructure", "Talking to Industry", and "How to Get Involved". Below the main image is a smaller section titled "Industry" with a small image of a telescope segment and the text: "The E-ELT presents a major opportunity for UK industry to bid for contracts in a wide range of engineering and technology fields. About 80% of the €1.08billion cost will be in industrial contracts."
